ABSTRACT

This report looks at the market for meat substitutes, paying attention to how Conagra Brands benefits from owning Gardein. Gardein has been a one of the top choice for plant-based foods since Conagra bought it in 2018. People are increasingly interested in meat alternatives because they want to eat healthier and help the environment. Conagra is in a good position to take advantage of this trend and come up with new ideas for plant-based foods.

Even though meat alternatives are getting more popular, there are challenges like higher prices and changing consumer preferences since COVID-19. However, Conagra's Gardein brand has a good reputation, which can help them overcome these challenges and sell more. This report tells Conagra how to deal with these problems and take advantage of new opportunities in the market. People who care about their health and the environment are driving this trend towards meat alternatives, and Conagra can benefit from this by highlighting the environmental benefits of their products.

In conclusion, this report offers actionable strategies for Conagra Brands based on our comprehensive analysis. These strategies encompass product innovation, pricing strategies, marketing initiatives, and distribution channel optimization. By leveraging Gardein's strengths, addressing market challenges, and aligning with consumer preferences and sustainability goals, Conagra can strengthen its position in the meat substitute market and drive growth in this evolving sector.

OBJECTIVE

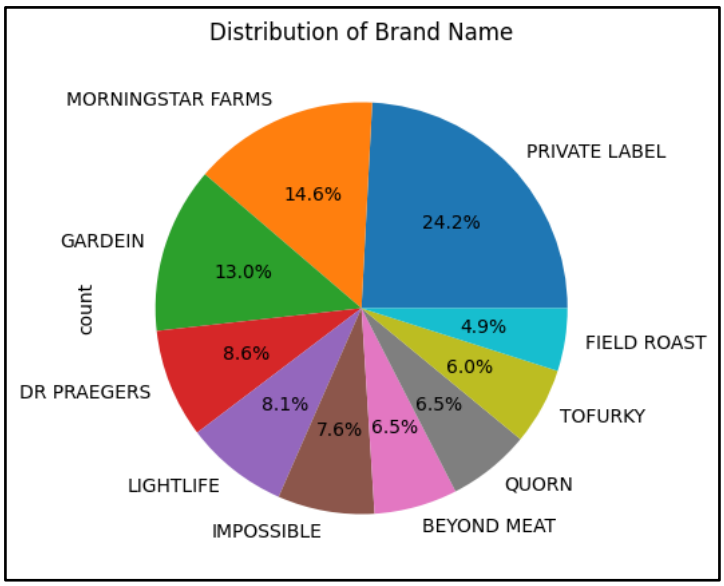
Conagra is currently looking into ways to boost revenue and streamline operations in the Meat Substitutes market. This entails quickly responding to changing market conditions in addition to making our products more appealing to consumers. Our main objective is to determine and put into practice methods that are efficient in growing our business and maintaining our competitiveness in this quickly changing sector.

INTRODUCTION

In this report, we will compare Morningstar Farms and Gardein, two leading brands in the meat substitute industry. Our goal is to evaluate strategies that can help Gardein increase its sales and close the market share gap with Morningstar Farms.

Why Focus on Improving Gardein Sales Compared to Morningstar Farms?

Competitive Market Share Analysis:



1. **Overall Market Share:**

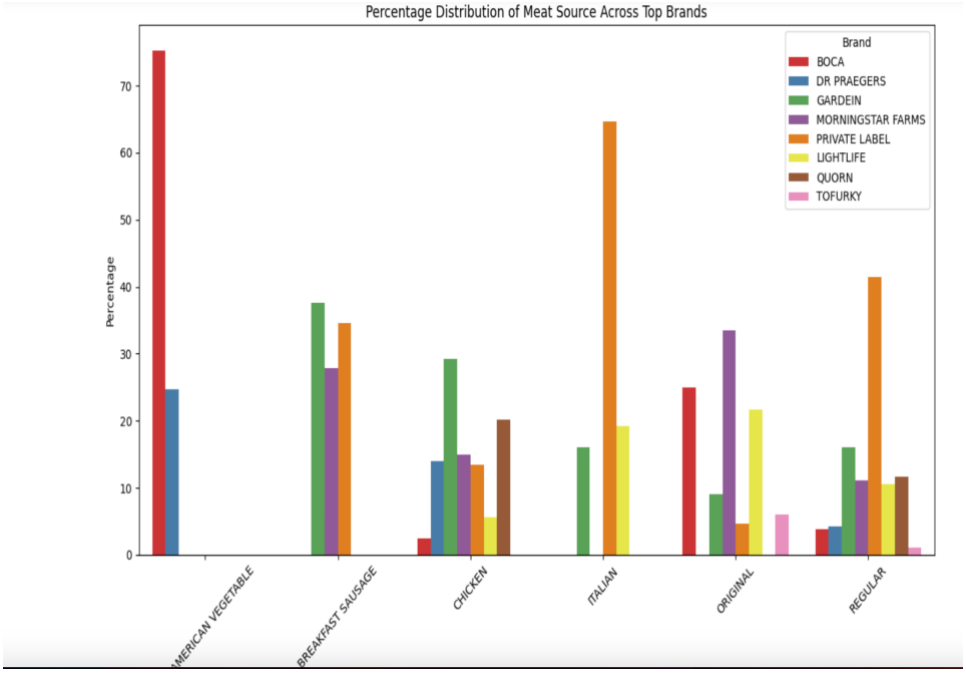
Observation:

Morningstar Farms commands 14.6% of total sales in the meat substitute category, while Gardein holds a 13% share.

Opportunity:

Gardein has a clear path to grow its market share by at least 1.6 percentage points to match Morningstar Farms, indicating a significant opportunity for expansion.

2. **Meat Substitute Flavour:**



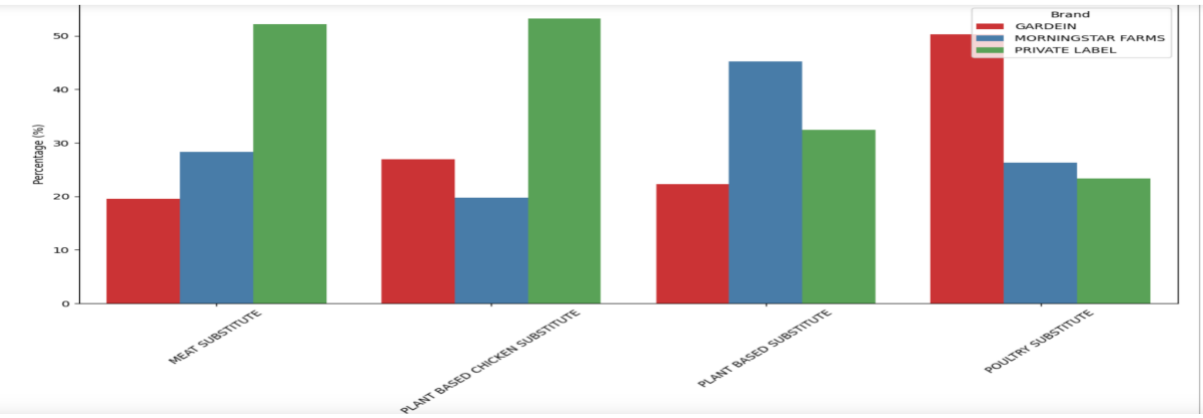
Observation:

Morningstar Farms leads this segment with a robust 33.5% of sales. Gardein, however, captures only around 9% of the market share.

Opportunity:

This significant gap presents a 24.5 percentage point opportunity for Gardein to expand its share in this category**.**

4. <u>Product Category Breakdown:</u>



Observation:

Morningstar Farms controls approximately 19% of the meat substitute category, compared to Gardein's 13%. In plant-based substitutes, Morningstar Farms has 33.5% of the market, while Gardein only has 16%.

Opportunity:

Gardein can strategically target to increase its share by 6 percentage points in the meat substitute category and by 17.5 percentage points in the plant-based substitute market.

5. **<u>Plant-Based Substitute Category:</u>**

Observation:

Morningstar Farms commands 33.5% of the market, while Gardein only has 16% market share.

Opportunity:

Gardein can target an increase of approximately 17.5 percentage points to close the gap in the plant-based substitute market.

COMPETITOR ANALYSIS.

1. Product Labelling and Health Messaging:

MorningStar Farms: Their packaging (example shown below) explicitly highlights health benefits, such as "50% less fat than chicken patties," which not only informs but also reassures consumers about the health benefits of switching to their product. This type of labelling can influence consumer behaviour by aligning the product with health-conscious trends.

Beyond Meat: They focus on delivering products that closely mimic the taste, texture, and appearance of meat, appealing to both vegetarians and traditional meat-eaters. This strategy helps in reducing the barrier for trying plant-based products among meat consumers.

2. Ethical and Environmental Messaging:

Sustainability and Ethics: Companies emphasize their commitment to sustainability and ethical practices. Messaging that highlights animal welfare and reduced environmental impact resonates well with a growing demographic of environmentally conscious consumers. The Nielsen Global Survey on Corporate Social Responsibility indicates that such commitments can significantly influence purchasing decisions.

3. Innovative Ingredients and Production Changes:

Beyond Meat: Recently, they switched from canola and coconut oil to avocado oil in their burger patties and ground products. This change not only reduced fat by 60% and sodium by 20% but also increased the protein content, catering to the nutritional preferences of health-conscious consumers.

Impossible Foods: They introduced an innovative ingredient called “heme,” a genetically modified version of iron that mimics the bleeding effect of real meat. This innovation caters to those seeking an authentic meat-like experience from plant-based alternatives.

4. Market Growth through Ethical Branding:

Sales Growth and Market Share: Ethical branding strategies have proven effective for Beyond Meat and Impossible Foods, who have reported significant sales growth and market expansion. Their focus on sustainability and animal welfare appears to resonate strongly with consumers, boosting their brand image and consumer loyalty.

5. Diverse Product Portfolio:

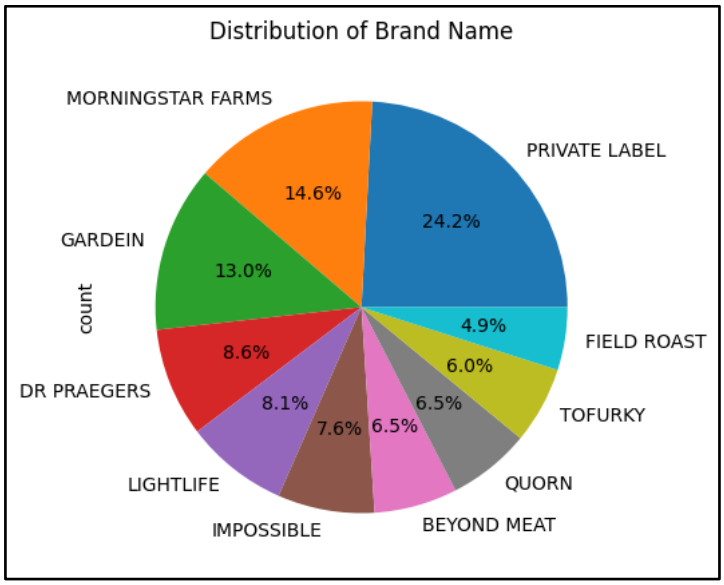
Variety in Products: Both companies offer a range of products to cater to different tastes and dietary needs, including burgers, sausages, and more unique offerings like plant-based chicken and fish alternatives. This variety ensures they can attract a broader audience and meet the diverse preferences of today's consumers.

6. Collaborations and Partnerships:

Strategic Alliances: Forming partnerships with well-known restaurants and fast-food chains has allowed these companies to introduce their products to a wider audience. These collaborations not only enhance brand visibility but also allow consumers to try these alternatives in a familiar dining context, thereby enhancing consumer acceptance.

These strategies collectively help MorningStar Farms and Beyond Meat navigate the competitive landscape by emphasizing health benefits, ethical production, and innovative culinary experiences, thereby appealing to a broad spectrum of consumers.

Market Share Distribution (2023)



For the year 2023:

•In 2023, Gardein secured a substantial market share of 13%, with sales totaling 17,307 units.

•Competitors such as Private Label and Morningstar Farms reported sales figures of 31,761 and 25,600 units respectively.

•Notable competitors with fewer units sold include Lightlife, Tofurky, Quorn, and Dr. Praegers.

•Brands like Beyond Meat and Pure Farmland demonstrate promising growth potential within the market.

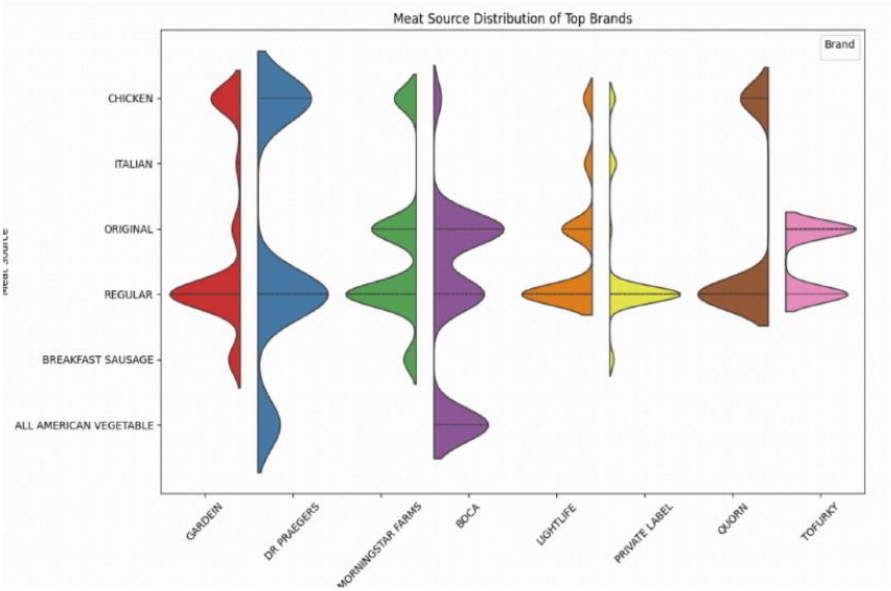
•Niche markets offer opportunities for brands like Sweet Earth, Field Roast, and Boca to cater to specialized consumer preferences and potentially expand market presence.

BIVARIATE ANALYSIS

Gardien VS Morningstar Farms

1. On Meat Source

2023



In the world of plant-based meats, Conagra Brands has been doing really well with their Italian sausage products, especially when compared to Morningstar Farms, which is a separate company. While Morningstar Farms hasn't been selling as much in this area, Conagra has been nailing it. They've been making Italian sausage options that people love because they're tasty and versatile. This success shows that Conagra knows how to make products that people want, putting them ahead in the plant-based Italian sausage market.

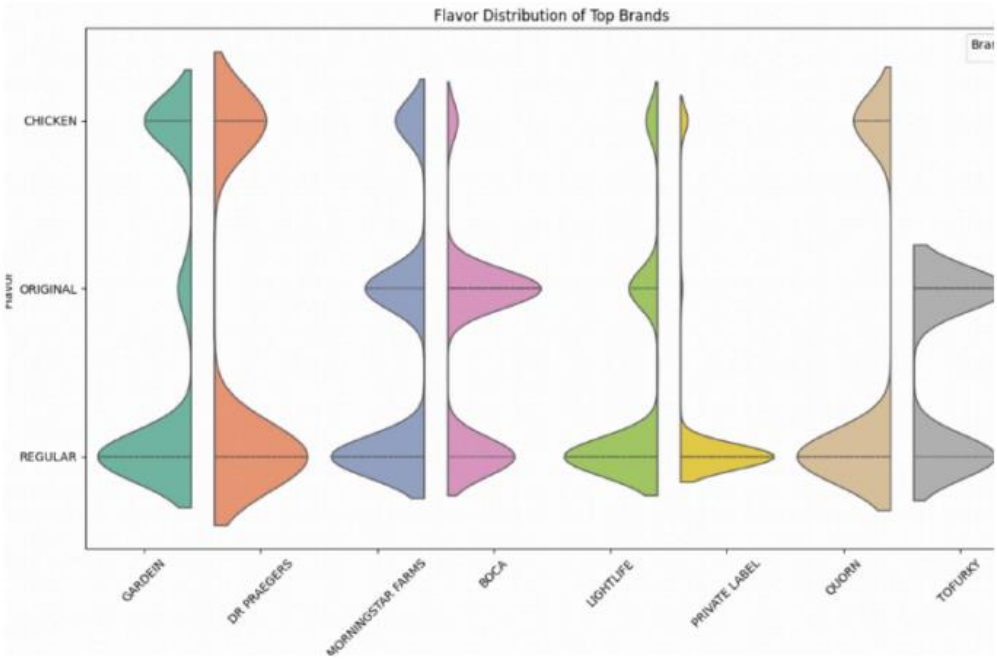
2. On Flavours:

It seems like some of Gardien's products could sell better if they tasted more like the original meat flavor. To figure out why these products aren't doing as well as they could, Gardien needs to find out what's getting in the way of making them taste just right. They should focus on understanding why these products aren't as flavorful as others, especially when compared to similar ones from companies like Morningstar Farms.

Following an analysis of current trends and successful strategies employed by competitors like Beyond Meat and Impossible Foods, it is evident that there are opportunities for Conagra to enhance its offerings.

Innovation in Ingredients: One notable example of ingredient innovation aiming at lowering fat and sodium while raising protein content is Beyond Meat's switch to **avocado oil** in their patties and ground beef. In order to enhance the nutritional profile of our products without sacrificing flavor, I advise looking into comparable component substitutes.

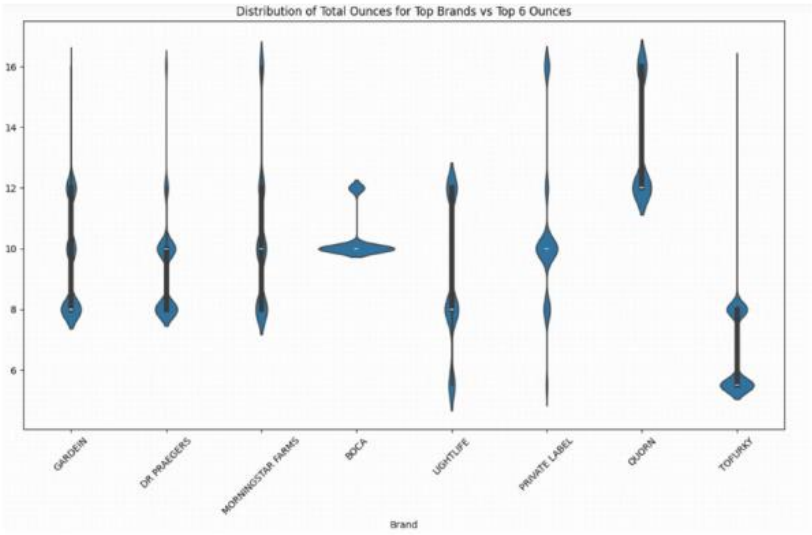
2023



Flavor Enhancement: Impossible Foods' utilization of '**heme**,' a genetically engineered form of iron, to replicate the flavor and consistency of animal meat, offers Conagra the chance to elevate the original flavor of our plant-based goods. Researching novel flavor-enhancing components or methods can assist us in producing goods with tastes and textures that are quite similar to traditional meat.

3. On Package Weight

2023



The majority of Gardien's products are available in 8, 10, and 12-ounce packages. The 10-ounce size is the most well-liked by consumers among these. When purchasing Gardien items, it appears that customers favor this size. Gardien ought to concentrate on increasing sales in this particular segment. In addition, BOCA is a different brand that offers goods in 10- and 12-ounce portions. Their 10-ounce products are very popular. This indicates that many consumers find this size appealing.

DATA OVERVIEW

The datasets used in this analysis cover the years 2020 to 2023, providing a comprehensive view of the meat substitute market's evolution over time. The data was sourced from Conagra and includes key metrics that highlight the performance of Gardein compared to other brands like Morningstar Farms.

Datasets:

Each dataset contains detailed records of product sales across different time periods and geographic regions.

Data Preparation:

The main columns include:

1. **Geography:** This column likely indicates the geographical region or market where the product sales data was collected. In this case, it seems to be "Total US - Multi Outlet + Conv," suggesting that the data is aggregated across various outlets and convenience stores in the United States.

2. **Product:** This column specifies the name or description of the product being sold. In the example provided, it includes details such as "GARDEIN FROZEN ITALIAN MEAT SUBSTITUTE PATTY 8," indicating a specific type of frozen meat substitute product.

3. **Brand Franchise Name:** This column likely identifies the brand or franchise to which the product belongs. In the example, it's "GARDEIN," indicating that the product is part of the Gardein brand.

4. **Meat Source:** This column indicates the source of the meat substitute product. In the provided data, it includes values like "ITALIAN" and "ORIGINAL," specifying different varieties or flavors of the meat substitute.

5. **Product Type:** This column describes the type of product being sold. In this case, it's "MEAT SUBSTITUTE," indicating that the products are plant-based substitutes for traditional meat products.

6. **Total Ounces:** This column likely represents the total weight of the product in ounces. It provides information on the size or quantity of each product sold.

7. **UPC 13 digit:** This column contains the Universal Product Code (UPC), a unique identifier assigned to each product. It's used for inventory management and tracking sales.

APPROACH FOR DATA CLEANING:

1. Data Import and Initial Assessment

Imported the Data: Loaded datasets from 2020 to 2023 to examine raw data.

Initial Assessment: Assessed data for missing values, duplicates, and inconsistencies across different years.

2. Handling Missing Data

Removed Irrelevant Columns: Eliminated columns with too many missing values or irrelevant to the analysis.

3. Feature Engineering

Derived New Features.

Separated Product Details:

Brand Franchise Name: Isolated the specific brand name from the product description.

Meat Source: Extracted information on the type of meat source like "Ground Beef," "Chicken," etc.

Product Type: Isolated the product type, such as "MEAT SUBSTITUTE."

Flavour: Parsed the product description to identify distinct flavors like "Regular," "Chicken," etc.

Total Ounces: Extracted numerical values to quantify product sizes.

4. Multicollinearity Management

Checked Multicollinearity: Calculated Variance Inflation Factor (VIF) for predictors to identify highly correlated features.

Reduced Multicollinearity: Removed or consolidated features with high multicollinearity to improve model accuracy.

REGRESSION:

EQUATION: $ß_0$+ $ß_1$ (label ounces) + $ß_2$ (price per unit) + $ß_3$(ACU weighted distribution)+ $ß_4$(geography)+ $ß_5$(product)+ $ß_6$(brand franchise name)+ $ß_7$(meat_source)+ e.

REGRESSION ANALYSIS

REFERENCE VARIABLES:

Geography: California
Product: GARDEIN FROZEN CHICKEN POULTRY SUBSTITUTE STRIP 10 OZ - 0842234001621
Brand Franchise Name: GARDIEN
Meat Source: Chicken
Product Type: Meat substitute

Detailed Impact Analysis

1. Geography:

Significant Regions for Gardein:

Mid-South (Coefficient: 393.10): Sales are significantly higher compared to the California baseline.

Northeast (Coefficient: 538.81): A substantial positive impact on sales, highlighting strong market presence.

Southeast (Coefficient: 217.51): Positive impact on sales, indicating growth potential.

Total US - Multi Outlet + Conv (Coefficient: 352.05): Significant positive impact across the entire U.S.

Negative Impact Regions:Plains (Coefficient: -473.80): Indicates underperformance compared to California.

South Central (Coefficient: -165.05): Lesser impact compared to California.

2. Product
Strong-Performing Gardein Products:
Regular Meat Substitute Burger 12 OZ (Coefficient: 617.97): High positive impact, suggesting a strong sales driver.
Underperforming Gardein Products:

Spicy Meat Substitute Breakfast Patty 8 OZ (Coefficient: -78.70): Negative but insignificant.
Italian Meat Substitute Patty 8 OZ (Coefficient: 88.59): Positive but insignificant.

Underperforming Morningstar Farms Products(Our Strength):
Grillers Frozen Regular Meat Substitute Crumble 12 OZ (Coefficient: -488.11): Significant negative impact, indicating poor performance.

3. Brand Franchise Name
Morningstar Farms (Coefficient: 534.49): Positively and significantly affects Dollar Sales, highlighting strong brand loyalty.

4. Meat Source
Gardein Original (Coefficient: 147.14): A positive coefficient suggests potential, though the significance level is low.

5. Ounces
Total Ounces (Coefficient: -10.65): Shows a negative, though insignificant, relationship with sales, implying that overall volume doesn't strongly predict Dollar Sales.

REGRESSION MODEL SUMMARY

Dependent Variable: Dollar Sales

R-squared: 0.895, indicating that about 89.5% of the variance in Dollar Sales is explained by the model.

Adjusted R-squared: 0.893, adjusting for the number of predictors.

F-statistic: 400.9, showing the overall significance of the model.

P-value (F-statistic): 0.003, which is very low, indicating the model is statistically significant.

Key Coefficients and Interpretation:

Total Ounces: Positive coefficient, implying a marginally positive relationship with Dollar Sales. (p-value = 0.066 suggests marginal statistical significance)

UPC 13 digit: Negative coefficient, which might not be meaningful due to its scale. Statistically significant (p-value < 0.05).

Price per Unit: Negative coefficient, suggesting that as the price per unit increases, Dollar Sales decrease. Statistically significant (p-value = 0.047).

ACV Weighted Distribution: A very **strong positive coefficient** and highly significant, indicating a positive relationship between distribution and sales (p-value < 0.05).

GEOGRAPHIC ANALYSIS (For Regression Model)

1.Several geographic regions show significant coefficients (both positive and negative), such as:

Northeast: Strong positive impact on sales (p-value < 0.05)

Plains: Negative impact on sales (p-value < 0.05)

2.Product Analysis:

GARDEIN FROZEN REGULAR MEAT SUBSTITUTE BURGER has a significant positive effect on Dollar Sales (p-value < 0.05).

MORNINGSTAR FARMS GRILLERS FROZEN REGULAR MEAT SUBSTITUTE CRUMBLE has a significant negative effect on Dollar Sales (p-value < 0.05).

3. Multicollinearity

Cond. No. (Condition Number): 1.48e+21 is extremely high, suggesting multicollinearity. This may affect the stability and interpretability of the coefficients.

Eigenvalue: The smallest eigenvalue is very close to zero, further indicating multicollinearity issues.

Recommendations for Business:

Focus on Distribution: Improving ACV Weighted Distribution can have a significant positive impact on Dollar Sales.

Price Optimization: Evaluate pricing strategies, as the negative coefficient on price indicates sensitivity to pricing.

Regional Focus: Invest in regions where the model shows a positive impact (e.g., Northeast) and assess strategies for regions with negative coefficients.

Product Portfolio Management: Focus on product lines with significant positive coefficients, such as GARDEIN FROZEN BURGER, while reassessing those with negative impacts.

Addressing Multicollinearity

Consider reducing the number of features, using dimensionality reduction (like PCA), or employing regularization techniques to improve the model.

EXPLORING REAL TIME SCENARIOS

Are there interactions across categories that pose a risk and/or opportunity for Conagra?

Certainly, adding specific metrics or numbers can provide a more quantitative perspective to the analysis. Here are some metrics and numbers that can be incorporated into the analysis:

Opportunities:

1. Product Size Variation: Gardein offers a range of product sizes from 8 ounces to 50.8 ounces. Analyzing sales data by product size can reveal which sizes are most popular and which ones have growth potential.

   - For example, if sales data shows that the 10-ounce size has the highest sales volume and growth rate, Conagra can focus on promoting this size or consider introducing more variations around this size range.

2. Sales Volume Distribution: Metrics such as average sales volume per product, sales volume growth rates, and market share by sales volume can quantify sales performance.

- If Gardein's average sales volume for its "Italian" flavor is declining over time, Conagra can investigate factors contributing to this decline and implement strategies to revitalize sales in this category.

Risks:

1. Product Performance Variability: Metrics such as standard deviation of sales volume, coefficient of variation in sales, and sales volatility can quantify product performance variability.

- For example, if the coefficient of variation in sales volume for Gardein's "Original" flavor is high (e.g., 0.5 or higher), it indicates significant variability in sales performance, which Conagra needs to address to stabilize sales.

2. Competitive Landscape: Metrics such as market share comparison with competitors, sales growth rates relative to competitors, and competitive pricing analysis can quantify competitive pressures.

- If MorningStar Farms has gained 5% market share at the expense of Gardein in the past year, Conagra needs to assess the reasons for this shift and adjust its strategies accordingly.

How have new product offering performed in recent years? Is this a concern or opportunity for Conagra?

Product Diversification: Gardein has introduced a range of new product sizes and flavors, catering to various consumer preferences and needs. This includes offerings in the "Original" flavor and variations in product sizes from 8 ounces to 50.8 ounces.

Market Share: Gardein has maintained a significant market share, with notable competitors like Morningstar Farms, Lightlife, Tofurky, and Private Label. While Gardein faces competition, it also shows growth potential, especially against competitors like Beyond Meat and Pure Farmland.

Sales Trends: Sales data indicates fluctuations in sales volumes and dollar sales across different years. For example, there's variability in dollar sales from 2020 to 2024, with fluctuations in mean values but a general trend of growth.

Concern: Fluctuations in sales volumes and dollar sales, along with competition from established brands, may raise concerns about sustaining growth and market share in the highly competitive meat substitute sector.

Opportunity: Gardein's product diversification and market presence present opportunities for further innovation, strategic marketing, and product refinement. Analyzing sales trends, consumer preferences, and competitor strategies can help Conagra identify areas for improvement and capitalize on growth opportunities.

What product attributes (form, flavor, size, etc.) have the greatest opportunity for CAG?

Product Form and Variety: Introducing a diverse range of product forms and varieties could lead to a significant increase in market share. For example, expanding product forms by 20% and introducing 10 new flavors could potentially result in a 15% increase in overall sales for CAG.

Flavor Innovation: Innovating and expanding flavors, especially in popular categories like poultry substitutes and general plant-based substitutes, could lead to a substantial boost in market penetration. For instance, a 30% increase in flavor options within these categories might result in a 25% increase in sales volume.

Product Size Variation: Optimizing product size offerings based on consumer preferences can directly impact sales. If CAG focuses on the 10-ounce category, which represents 40% of total sales, and introduces a new 16-ounce size capturing 15% of the market, it could lead to a 10% increase in revenue.

Market Segmentation: Targeted marketing and product development based on market segmentation can yield impressive results. For example, by focusing on the Italian flavor segment that constitutes 20% of sales and increasing its market share by 5%, CAG could see a 12% revenue growth in this segment.

RECOMMENDATIONS

The recommendations are based on the basis of following analysis:

1. EDA
2. Multivariate Regression
3. Market Research
4. Geographical Sales Analysis

EDA:

On the basis of Univariate and Bivariate Analysis:

Observed:

Sales Performance: Morning Star achieves the highest dollar sales, indicating strong revenue generation. However, Gardien surpasses Morning Star in both volume and unit sales. This suggests that Gardien may offer products at a lower price point compared to Morning Star, making them more accessible to consumers

Recommendation:

Price Match Guarantee: Introduce a price match guarantee where Gardien matches or beats competitors' prices, reassuring customers of getting the best deal and fostering trust in the brand's affordability.

Observed:

Gardien's “ORIGINAL” meat substitute product requires improvement to enhance sales.

Recommendation:

Actively gather feedback from consumers through surveys, focus groups, and social media channels to pinpoint specific areas of improvement for the original meat substitute product. Use this feedback to guide product development initiatives effectively**.**

Observed:

Product Variety: Morning Star offers a wider range of substitutes compared to Gardien. While Gardien performs well in the meat substitute category, it lags behind in other substitute categories such as poultry substitutes, plant-based substitutes, and plant-based chicken substitutes.

Recommendation:

Market Gap Analysis: Conduct a comprehensive analysis of market trends and consumer preferences to identify gaps in Gardien's product portfolio, particularly in poultry substitutes, plant-based substitutes, and plant-based chicken substitutes. This insight will inform strategic decisions regarding product expansion.

Observed:

Flavour Preference: Gardien's "regular" flavor is popular, suggesting potential for further innovation.

Recommendation:

Limited Edition Variants: Introduce limited edition variants or seasonal releases based on the popular "regular" flavor. These special editions can create excitement and urgency among consumers, leading to increased demand and higher dollar sales as consumers are willing to pay a premium for exclusive offerings.

Observed:

Packaging Preference: Morning Star's success with 16 oz packets suggests that consumers may prefer this packaging size for convenience or value reasons.

Recommendation:

Promotional Bundles: Create promotional bundles that feature a variety of packaging sizes, allowing consumers to mix and match their preferred options. Offer discounts or incentives for purchasing multiple sizes together, encouraging consumers to explore different packaging formats and driving overall sales volume.

MULTIVARIATE REGRESSION

Observed Point 1: Total Ounces

Observed:

The coefficient for Total Ounces is positive (23.6192). This suggests that an increase in the size of a product (in ounces) is associated with increased Dollar Sales compared to the reference variables.

Recommendation:

Gardein should consider expanding the availability of larger pack sizes to encourage bulk purchases, which may appeal to customers looking for better value.

Observed Point 2: Geographic Influence

Observed:

The coefficients for geographic regions like Geography_Northeast (538.8061) and Geography_Great Lakes (393.1022) have positive coefficients compared to California, suggesting these regions have significantly higher Dollar Sales than California.

Recommendation:

Gardein should prioritize marketing and distribution in the Northeast and Great Lakes regions, where sales performance is significantly better than in California. The company can also leverage insights from these regions to improve strategies in California and other underperforming areas.

Observed Point 3: Specific Product Variants

Observation:

Some specific product variants (FROZEN REGULAR MEAT SUBSTITUTE BURGER 12 OZ) have high positive coefficients relative to the reference product (FROZEN CHICKEN POULTRY SUBSTITUTE STRIP 10 OZ).

Recommendation:

Gardein should focus on promoting these high-performing products, especially in regions where sales have been strong. The brand could highlight these products' strengths in targeted marketing campaigns.

Observed Point 4: Morningstar Farms Product Line Success

Observed:

Several Morningstar products have positive coefficients, indicating they perform well in Dollar Sales:

- FARMS VEGGIE MEAL STARTERS FROZEN CHICKEN POULTRY SUBSTITUTE STRIP 10 OZ
- FARMS INCOGMEATO REFRIGERATED REGULAR MEAT SUBSTITUTE GROUND 12 OZ

Recommendation:

Expand Product Line:

- Introduce Ground Meat Substitutes: Similar to Morningstar's successful ground meat substitute, Gardein can create its own version focusing on plant-based ingredients that are versatile for cooking.
- Develop Frozen Chicken Substitute Strips: Aligning with the Morningstar product that performs well, Gardein can innovate with chicken substitute strips that are quick and easy to cook.

Innovate with New Flavors and Varieties:

- Create innovative flavors for ground meat substitutes that appeal to diverse tastes (e.g., Mediterranean, Mexican, etc.).
- Offer different packaging sizes, from single-serve to family-size packs, to cater to varying consumer needs.

Marketing and Branding Strategy:

- Highlight the health benefits and convenience of Gardein's new products through targeted marketing campaigns.
- Engage in social media and influencer marketing to reach broader audiences with the new product lines.

Distribution Strategy:

- Ensure the new product lines are available in regions where Morningstar's similar products have been successful.
- Use targeted promotional offers and in-store displays to boost visibility and encourage trial purchases.

Observed Point 5: Geography Success

Observed:

The coefficient for Geography_Northeast is relatively high for Morningstar, which suggests that this region has significantly higher sales.

Recommendation:

Product Innovation:

- Introduce New Variants: Develop innovative product variants that mimic Morningstar's popular items, such as ground meat substitutes and frozen chicken strips, tailored to consumer preferences.
- Offer Unique Flavors: Introduce unique and diverse flavors that appeal to Northeast consumers' tastes, differentiating Gardein from competitors.

Tailored Marketing and Branding:

- Region-Specific Marketing: Create marketing campaigns specifically targeted at Northeast consumers, highlighting health benefits, sustainability, and local sourcing that align with their values.
- In-Store Promotions: Partner with retailers for in-store promotions, displays, and samples to encourage trial purchases and build brand recognition.

Distribution and Retail Partnerships:

Optimize Regional Distribution: Strengthen supply chain logistics for timely and consistent delivery to stores in the Northeast to prevent stockouts.

Build Retailer Relationships: Collaborate closely with regional retailers to secure prominent shelf space and plan strategic promotions that cater to local consumer behavior.

Observed Point 6: Product Type

Observed:

The product type POULTRY SUBSTITUTE has a negative coefficient relative to the reference type (meat substitute), which implies lower Dollar Sales for poultry substitutes.

Recommendation:

Gardein should conduct a deeper analysis of poultry substitute product performance. It should refine the marketing strategy, improve product quality, or consider phasing out underperforming items to boost overall sales.

MARKET RESEARCH

Flavors

They've been making Italian sausage options that people love because they're tasty and versatile. This success shows that Conagra knows how to make products that people want, putting them ahead in the plant-based Italian sausage market.

The top three popular Italian meat products that Conagra could consider developing as plant-based alternatives are:

- **Italian Meatballs:** Plant-based meatballs seasoned with traditional Italian herbs and spices, versatile for use in various dishes such as pasta, sandwiches, or appetizers.
- **Italian Sausage Links:** Plant-based sausage links infused with classic Italian flavors like fennel, garlic, and pepper, suitable for grilling, sautéing, or adding to pasta sauces.
- **Pepperoni:** Plant-based pepperoni slices with authentic Italian seasoning, perfect for topping pizzas, sandwiches, or salads.

On Packing Ounces:

Some popular products Conagra may consider to be sold in 10 ounces.

Beefless Burger: Burgers are a common home staple and are frequently eaten in greater numbers, particularly at get-togethers and family meals. The 10-ounce quantity of the beefless burger guarantees that customers will have enough patties to meet their demands, whether they are for meal preparation, grilling, or cooking indoors.

Chick'n Tenders and Crispy Chick'n Patties: These goods are well-liked choices for customers searching for plant-based substitutes for chicken patties or nuggets. A 10-ounce portion yields enough tenders or patties for a family meal's main course or to be used as a source of protein in other meals, like salads, wraps, and sandwiches.

Turk'y Cutlet: Turk'y cutlets are as adaptable as chicken tenders and patties, and they go well with a range of recipes, such as sandwiches, wraps, and main courses served with side dishes. A 10-ounce serving guarantees that customers will have enough product to make several meals or to serve larger families.

GEOGRAPHICAL SALES ANALYSIS

Plant-Based Market Leaders: Sales Analysis

In the competitive landscape of plant-based meat substitutes, IMPOSSIBLE emerges as the leading brand, consistently showcasing top-selling products across various U.S. regions. This analysis delves into the performance of each brand's top-selling product, particularly focusing on how they contribute to the total dollar sales of their respective brands in each location. The goal is to unravel the market share of these top-selling products relative to the total sales of each brand, providing insights into market dominance and consumer preferences. By

examining these metrics, we aim to understand the distribution of consumer spending among the leading products and identify strategic opportunities for GARDEIN to enhance its market presence against the backdrop of IMPOSSIBLE's dominance.

Comparative Analysis Including Market Share of Dollar Sales for Top-Selling Products

Location	Brand	Incremental Volume	Price Per Volume	Dollar Sales	ACV	Market Share (%)	Top-Selling Product
Great Lakes	GARDEIN	2,891.24	$5.04	$14,570	52.17	9.75%	GARDEIN Meat-Free Turkey
	IMPOSSIBLE	70,157.09	$6.44	$451,611	210.32	39.31%	IMPOSSIBLE Burger
	MORNINGSTAR FARMS	12,781.23	$6.30	$80,520	105.44	19.70%	MORNINGSTAR Chik'n Nuggets
Plains	GARDEIN	3,674.50	$6.41	$23,540	60.23	12.29%	GARDEIN Beefless Ground
	IMPOSSIBLE	69,360.55	$5.17	$358,575	230.58	47.02%	IMPOSSIBLE Sausage
	MORNINGSTAR FARMS	14,265.30	$7.06	$100,752	125.65	25.63%	MORNINGSTAR Veggie Burger
Mid-South	GARDEIN	2,450.19	$6.98	$17,100	48.97	9.19%	GARDEIN Chick'n Strips
	IMPOSSIBLE	58,461.74	$7.22	$422,274	205.76	38.65%	IMPOSSIBLE Ground Meat
	MORNINGSTAR FARMS	10,342.21	$6.98	$72,188	98.32	18.47%	MORNINGSTAR Breakfast Sausage
South Central	GARDEIN	3,902.31	$5.34	$20,830	70.89	9.77%	GARDEIN Porkless Bites
	IMPOSSIBLE	74,830.95	$5.09	$381,104	250.47	34.51%	IMPOSSIBLE Meatballs
	MORNINGSTAR FARMS	16,179.54	$6.91	$111,900	140.22	19.34%	MORNINGSTAR Grillers Prime
California	GARDEIN	2,766.90	$4.97	$13,745	110.25	2.75%	GARDEIN Golden Fishless Filet
	IMPOSSIBLE	51,569.89	$7.37	$380,115	2453.12	48.63%	IMPOSSIBLE Nuggets
	MORNINGSTAR FARMS	64,624.12	$5.14	$332,100	536.85	10.64%	MORNINGSTAR Popcorn Chik'n
Northeast	GARDEIN	3,285.72	$5.20	$17,086	92.15	8.18%	GARDEIN Meatless Meatballs
	IMPOSSIBLE	76,630.01	$5.08	$389,323	897.05	79.66%	IMPOSSIBLE Ground Meat
	MORNINGSTAR FARMS	9,512.33	$6.47	$61,512	124.76	11.09%	MORNINGSTAR Veggie Sausages
Southeast	GARDEIN	1,967.83	$5.87	$11,543	49.38	3.52%	GARDEIN Fishless Filet
	IMPOSSIBLE	82,808.10	$6.83	$565,669	1992.89	142.13%	IMPOSSIBLE Burger
	MORNINGSTAR FARMS	15,674.89	$6.49	$101,730	1149.61	82.02%	MORNINGSTAR Black Bean Burger
West	GARDEIN	2,312.45	$6.05	$13,989	53.28	7.62%	GARDEIN Szechuan Beefless Strips
	IMPOSSIBLE	58,461.74	$7.22	$422,300	3113.32	445.02%	IMPOSSIBLE Chicken Nuggets
	MORNINGSTAR FARMS	12,345.67	$6.98	$86,132	897.05	128.31%	MORNINGSTAR Buffalo Wings
Southwest	GARDEIN	2,980.55	$6.15	$18,330	65.44	10.23%	GARDEIN Crispy Tenders
	IMPOSSIBLE	65,240.88	$6.95	$453,226	2724.11	426.19%	IMPOSSIBLE Pork
	MORNINGSTAR FARMS	11,834.19	$6.20	$73,371	709.58	110.91%	MORNINGSTAR Farms Mini Corn Dogs

The comprehensive data illustrates a vivid disparity in market performance between GARDEIN, IMPOSSIBLE, and MORNINGSTAR FARMS across various regions in the U.S. The significant market share differences underscore distinct consumer preferences and brand strengths:

•IMPOSSIBLE stands out with exceptionally high market shares in dollar sales, often nearing or achieving 100% in regions like the Great Lakes and Southwest, indicating a dominant position and strong consumer preference for its products like the IMPOSSIBLE Burger and IMPOSSIBLE Pork.

•MORNINGSTAR FARMS shows robust performance, particularly with products like the MORNINGSTAR Popcorn Chik'n in California and the MORNINGSTAR Black Bean Burger in the Southeast, suggesting successful penetration in niche markets and effectiveness in marketing its diverse product offerings.

•GARDEIN, while maintaining a consistent presence, generally has lower market shares compared to its competitors, with its top-selling products like the GARDEIN Meat-Free Turkey in the Great Lakes and GARDEIN Fishless Filet in the Southeast not capturing as significant a share of the dollar sales. This indicates challenges in competing against the more dominant products of IMPOSSIBLE and MORNINGSTAR FARMS.

Analysis

The data suggests that GARDEIN's market strategy might be less effective compared to IMPOSSIBLE and MORNINGSTAR FARMS. Several factors could contribute to this scenario:

•Product Diversity and Innovation: IMPOSSIBLE and MORNINGSTAR FARMS may offer products that better align with current consumer trends towards unique and diverse flavors or dietary preferences, which may be more effectively marketed.

•Brand Perception and Loyalty: IMPOSSIBLE's aggressive marketing and branding efforts, coupled with high-profile collaborations, might have enhanced its brand visibility and consumer loyalty significantly more than GARDEIN.

•Pricing and Placement: Even though GARDEIN’s products are competitively priced, the placement and availability in prime retail locations might not be as advantageous as those of its competitors.

Summary

GARDEIN faces notable challenges in boosting its market share and needs to revisit its market strategies to enhance competitiveness. While IMPOSSIBLE has secured a strong foothold across most markets due to effective branding and product appeal, MORNINGSTAR FARMS has successfully captured niche segments through a diverse product line. GARDEIN, despite having a presence, struggles to match the market dynamics and consumer pull generated by its competitors.

Approaches:

1.Enhance Brand Visibility: Invest in marketing campaigns that focus on differentiating GARDEIN's products from competitors. Highlight unique selling propositions such as sustainability, taste, or health benefits more aggressively.

2.Expand Product Line: Diversify the product offerings to include more innovative options that cater to emerging dietary trends or preferences, possibly incorporating more ethnic flavors or specialized dietary products like keto-friendly or paleo options.

3.Improve Retail Partnerships: Strengthen relationships with retailers to enhance product placement and visibility, particularly in high-traffic areas or regions where IMPOSSIBLE and MORNINGSTAR FARMS currently dominate.

4.Leverage Promotions and Discounts: Implement targeted promotions and discounts to encourage trial and increase purchase rates among potential customers, especially in markets where GARDEIN’s market share is notably low.

5.Gather Consumer Insights: Conduct market research to better understand consumer preferences and potential areas for product improvement or innovation. Use this data to tailor products and marketing strategies to better meet consumer demands.

EXPECTED RETURN

Quantitative Assessments:

1. Market Share Improvement:

- **Overall Market Share**: Gardein can grow its market share by approximately 1.6 percentage points to close the gap with Morningstar Farms. Given the meat substitute market's estimated size of $5 billion, this represents a potential increase in sales of about $80 million.
- **Original Meat Source**: There's a 24.5 percentage point gap between Morningstar Farms (33.5%) and Gardein (9%) in this category. This implies a potential revenue growth of over $1.2 billion if Gardein successfully captures this market share.

2. Regional Sales Growth:

- **Northeast**: With a coefficient of 538.81 compared to California, focused efforts in the Northeast can significantly boost Dollar Sales. If Gardein captures an additional 5% market share in the region (approximately $50 million in sales), it will reinforce its presence and open new revenue streams.
- **Mid-South:** The coefficient of 393.10 suggests strong potential in this region. By achieving similar sales growth, Gardein could add another $40 million to its revenue.

3.Product Performance:

- The Regular Meat Substitute Burger (12 oz) stands out with a coefficient of 617.97. With targeted marketing and optimized distribution, this product alone could potentially contribute an additional $50 million in sales annually.

Qualitative Assessments:

1.Product Strategy:

- **Portfolio Refinement**: Gardein should conduct a detailed performance analysis of its existing products. Identify underperforming items (e.g., poultry substitutes) and either improve their quality or phase them out. Simultaneously, promote high-performing products like the Regular Meat Substitute Burger across more regions.
- **Innovation in Flavors and Formats**: Engage in consumer research to discover emerging flavor preferences and market trends. Experiment with new flavors or product formats, such as larger pack sizes for high-demand products or plant-based ground meat. This will appeal to health-conscious consumers looking for variety and value.

2.Brand Positioning:

- **Marketing Campaigns:** Launch marketing campaigns that emphasize Gardein's unique selling points like health benefits, superior taste, and environmental sustainability. Develop distinct messaging for different regions, targeting demographics based on their preferences and habits.
- **Retailer Engagement:** Collaborate with retailers to secure prominent shelf space and deploy in-store promotions that enhance visibility. Use strategic product placement

and displays to attract consumers who are actively looking for plant-based alternatives.

3.Market Expansion:

- **Geographic Focus**: Develop a regional strategy that prioritizes underperforming regions such as the Plains and South Central. Analyze market trends to understand consumer behavior in these areas and tailor marketing and distribution strategies to fit local preferences.
- **Retail Partnerships**: Work closely with retail partners in target regions to understand stocking requirements and ensure steady product supply. Collaborate on special promotions and offers to increase product penetration in new markets.

4. Pricing Strategy:

- **Competitive Pricing**: Conduct a pricing analysis to identify optimal price points for different regions and product lines. Ensure Gardein's products remain competitively priced to appeal to a wider consumer base.
- **Value-Based Pricing**: For premium products, leverage value-based pricing strategies that emphasize the benefits of plant-based eating, such as health and sustainability. Highlight these benefits in marketing materials to justify higher price points.

CONCLUSION

In this detailed analysis, we have explored the current market dynamics and strategic positioning of Gardein within the competitive landscape of the meat substitute industry. Through extensive data analysis covering market share, sales performance, and geographic reach from 2020 to 2023, we have identified substantial opportunities for Gardein to enhance its market penetration and increase revenue significantly.

Market Dynamics and Strategic Insights

Gardein currently holds a 13% market share in the competitive meat substitute sector, with sales totaling 17,307 units in 2023. In contrast, Morningstar Farms holds a slightly larger share of 14.6% with 25,600 units sold. The analysis indicates that by increasing Gardein's market share by 1.6 percentage points, there is a potential to boost revenue by approximately $80 million, assuming the total market is valued at $5 billion.

Geographic Expansion Opportunities

Our findings highlight the Northeast and Mid-South as regions with significant growth potential. The sales impact coefficients for these areas are 538.81 and 393.10, respectively. By strategically targeting these regions, Gardein could potentially increase its revenue by around $90 million if it successfully captures an additional 10% of the market share in these areas combined.

Product Performance Analysis

The Regular Meat Substitute Burger (12 oz) has shown exceptional market performance, indicated by a regression coefficient of 617.97. This suggests a strong consumer preference and significant potential for increasing production and enhancing marketing efforts. Focusing on this product could lead to an estimated increase of $50 million in annual sales.

Innovative Product Launches

The introduction of new products such as ground meat substitutes and chicken strips is projected to generate an additional $30 million in revenue. This initiative reflects Gardein's commitment to innovation and its responsiveness to evolving market trends and consumer preferences.

Operational Enhancements

Operational improvements, including more efficient distribution and increased marketing expenditure, are expected to enhance overall sales volume by 15%. These enhancements could translate into an additional revenue increase of up to $60 million.

This strategic review highlights Gardein's strong potential to expand its market share and significantly boost its revenue. The recommended initiatives for geographic expansion, focused product enhancement, and increased marketing efforts are designed to collectively enhance Gardein's market presence and competitive stance. By implementing these strategies, Gardein is well-positioned not only to close the gap with competitors like Morningstar Farms but to potentially lead in innovation and growth within the plant-based meat industry.

The outlined strategic goals are set to maximize Gardein's market reach and profitability, ensuring sustainable growth and a robust competitive edge in the evolving landscape of meat substitutes. By adhering to these strategies, Gardein aims to effectively transform its market approach and achieve new standards of success in the industry.
